MEDECO X4 CERTIFICATION 8AM - NOON \$35
TCC BANQUET ROOM "A"
Instructor: GUY ROBINSON, CML
FACTORY CERTIFIED TRAINER

Design and operation of Medeco X4 and classic Keymark products are demonstrated. Hands-on exercises include calculating an A2 pinning matrix and decoding a Medeco X4 key. Students will pin a small format interchangeable core to the decoded key, control key and master key. Other styles of interchangeable core cylinders to retrofit Sargent, Schlage, Corbin Russwin, and Yale are included within the pinning instructions class segment, as well as cam locks and other cylinders. An overview of Medeco eCylinders for SFIC applications is included.

Stay and attend the Medeco XT training session
 this afternoon with Guy and we will treat you to lunch!

MEDECO XT CERTIFICATION 1PM - 5PM \$35
TCC BANQUET ROOM "A"
Instructor: GUY ROBINSON, CML
FACTORY CERTIFIED TRAINER

Monitor your security in three clicks. Medeco XT Data Analytics allow you to easily identify unauthorized access to locks in your system. Three simple clicks will answer WHO? WHEN? WHERE? AND WHY? The features and benefits of Medeco XT and its capabilities will be examined. System requirements, how to manage ordering, system setup, software programming and basic system management is taught. Sales techniques emphasizing XT features will be discussed.

BASIC AUTOMOTIVE LOCKSMITH SKILLS 8AM - NOON \$50
TCC BANQUET ROOM "C"
Instructor: GABE DE GAALON, CPL, OWNER GABES LOCK & KEY,
CERTIFIED INSTRUCTOR

Class will begin with a brief history of automotive locks featuring early lock systems, security driven innovation, key and lock types, and regular vs higher security locks and keys. We will also take a brief look at the differences between mechanical keys, electronic security systems in keys and ignitions, programming and cloning. Students will learn:

- Three ways to make a new key from an old key or code tag.
- Duplicating and cutting to code.
- Five ways to generate a new key to replace a lost key. Code off lock, reading wafers or pins, impression a key, wafer readers, disassemble and read wafer numbers.
- Rekeying or replacing vehicle locks. Identifying equipment needed such as wafers, pins, caps and locks from **STRATTEC** or ASP. Removing locks from doors, ignitions and trunks.
- Auto opening tools and techniques. Opening kits, selecting door to open and equipment concerns.
- Instructor will also provide an overview of working with & servicing motorcycle locks

Stay and attend the Automotive Locksmith Business training
 session this afternoon with Steve Shain and we will treat you to lunch

DOOR CLOSERS AND EXIT DEVICES 8AM - NOON \$35
TCC MEETING ROOM "A"
Instructor: SCOTT JONES, TECHNICAL PRODUCTS
SPECIALIST, ALLEGION FACTORY TRAINED INSTRUCTOR

Introduction to closers and exit devices. We will discuss common exit device and closer applications, review closer arms and mounting methods along with the different styles of exit devices and their uses.

- ◆ Exit device terminology and Von Duprin nomenclature
- ◆ Panic & fire exits/New Quiet EL device
- ◆ New concealed vertical cable system & essential components of an exit device
- ◆ Outside trim options
- ◆ Popular electrified exit devices
- ◆ Mechanical door closers - Maintenance & adjustments

- ◆ Tips & tricks for closers and exit hardware

Stay and attend the Managing Electronic Lock training
 session this afternoon with Scott and we will treat you to lunch!

USER MANAGED ELECTRIC LOCKS 1PM - 5PM \$35
TCC MEETING ROOM "A"
Instructor: SCOTT JONES, TECHNICAL PRODUCTS
SPECIALIST, ALLEGION FACTORY TRAINED INSTRUCTOR

There are more user-managed locks on the market today than ever before. Choosing the one that is best for any given opening and any given client isn't always easy. Attend this session to learn more about your choices from Schlage. Learn what these locks have in common and how they differ, and ultimately, learn how to use them to provide more convenient security for your customers. Topics include:

- ◆ Newest Schlage Lock, the NDE series wireless lock featuring Engage Technology
- ◆ Keypad programming with the CO-100
- ◆ Computer based programming with the CO-200
- ◆ Taking the mystery out of cloud-based technology and security as they relate to Schlage's NDE and LE series Engage locks.

AUTOMOTIVE LOCKSMITH BUSINESS 1PM - 5PM \$35
TCC BANQUET ROOM "C"
Instructor: STEVE SHAIN, KEYLINE USA NATIONAL SALES MGR

Expand your business with automotive locksmithing and watch your profits grow. If you are tired of turning away requests for automotive lock work but are new to this field of locksmithing business then this is the training session that you MUST attend. Steve Shain has a thirty plus year history in our industry that has been devoted to automotive locking security. He is the "GURU" for the automotive locksmith. Today he will teach you the basics of transponder technology. Steve will help to clear the question marks that appear in your mind when you are asked to make keys for cars with transponder equipment. He will demonstrate the ease with which you can program transponders utilizing the most effective equipment and key machines in the field at this time.
