Quick Shim Hinge

QKSFBB179NRP 4.5X4.5

The right hinge keeps doors properly aligned and operating smoothly.

Introducing Quickshim the commercial grade adjustable hinge.

Quickshim utilizes a patented Twist-to Shim Collar that is designed as a fast solution to binding or sagging doors by squaring doors in a fraction of the time you would need with a standard hinge.

The high quality and durable construction ensures you get the right solution for a wide range of door applications.

The Quickshim: Determine which hinge needs adjustment to allow the door to hang properly in the door frame. Loosen but do not remove the screws from the hinge. For best results; only back out screws two turns. Insert screwdriver through adjustment tool. Slide adjustment tool down to position onto the quick shim adjustable collar and turn the collar to make appropriate adjustment. Once adjustment is complete, simply tighten the screws. Repeat if alignment needs further adjustment.

- Standard weight ball bearing
- 5 knuckle hinge
- Includes screws, Twist-to-Shim collars and an adjustment tool for turning collars
- Non-Removable pin
- Non-ferrous hinge
- For wood or metal doors
